PROFESSIONAL OVERVIEW

Technology leader with 20+ years building enterprise software across four continents. Led engineering teams of up to 15 and ran a program organisation of 52 people, managed multi-million-dollar programs, and built products showcased on the biggest stages. Founded Geahsoft in 2024, an AI-first consulting and software development practice, after a senior career at Oracle, Thomson Reuters, Accenture, and other major organizations.

Long Story Short: Consulting work revealed problems deep enough to build products around. **Applicora** is a career and talent AI platform redefining hiring with 9-dimensional ATS scoring for job seekers and a 14-dimension matching algorithm for employers. **Agentino** is a live AI platform for service businesses automating follow-ups, reviews, referrals, rebookings, and upsells via SMS, email, or WhatsApp (agentino.app). Both solve real gaps in their markets.
